EDUCATION

Indian Institute of Information Technology Ranchi

Bachelor of Technology in Computer Science and Engineering

Dec 2021 – May 2025

CGPA: 8.48

EXPERIENCE

Software Engineer

CallHub (Gaglers)

February 2025– Present

Bengaluru, Karnataka

- Built and maintained scalable backend services using **Django REST Framework** and PostgreSQL, exposing **REST APIs** consumed across multiple applications, and built front-end features in **React**; deployed containerized services on AWS using Docker.
- Optimized PostgreSQL queries** through indexing, joins, and query tuning, improving API response times while writing unit tests and contributing to CI/CD workflows.
- Designed backend services powering AI-assisted workflows, building reusable APIs, improving observability, and automating deployment pipelines for scalable internal developer experiences.

Software Engineer Intern

Ericsson

May 2024 – September 2024

Bengaluru, Karnataka

- Developed Java-based backend automation for 5G network management by processing operational network data, reducing routine processing time by **90%**
- Worked on a zero-touch network management system, increasing team productivity by **25%** through streamlined workflows.
- Analyzed operational datasets to identify production issues, improving troubleshooting success by **95%** and reducing downtime by **40%**

PROJECTS

Groundwork | *React, Django REST Framework, PostgreSQL, Celery, Redis, JWT*

2026

- Built and deployed a **multi-tenant team workspace** end to end (React + Django API) with org signup, Kanban boards, async reports, **role-based permissions**, JWT auth, and **Celery + Redis** jobs. [Live App](#)
- Signature “**Ask your workspace**” **AI copilot** answers using **only that org’s own data**, cites its sources, and refuses to answer when unsure (grounded, no hallucinations); tuned for scale (**201 queries to 1**, 20 ms p95). [GitHub Repo](#)

Convene | *React, WebRTC, FastAPI, python-socketio, Groq*

2026

- Built and deployed a browser video-calling platform: **multi-party WebRTC** calls, screen share, in-call chat, presence, and active-speaker detection, with a **Python signaling server** (FastAPI + python-socketio). [Live App](#)
- Signature **AI meeting notes** transcribe the call and produce a summary and action items **drawn only from what was said**, each backed by a transcript quote; deployed on Render + Netlify with STUN/TURN. [GitHub Repo](#)

SKILLS

Programming: Python, JavaScript, SQL, Java

Frameworks/ Libraries: Django, Django REST Framework, REST APIs, React.js, Redux, Node.js, Express.js

Cloud and Devops: AWS, Docker, Kafka, Redis, CI/CD

Databases: PostgreSQL, MongoDB, DynamoDB

Tools: Git, GitHub

Technical Skills: OOPs, RDBMS, Distributed Systems, Query Optimization, Data Structures and Algorithms, Operating Systems

ACHIEVEMENTS

LeetCode: Solved over 500 questions, Highest Contest Rating: 1672

Shortlisted Myntra WeForShe Hackathon: Selected amongst the top 8% of the teams at the Ideation Round

Secured top 400, Google Girl Hackathon: Cleared first round, selected among the top 400 participants out of 26,000 (Top 1.5 percent)
